V1.1 amendments

NMTNG Co-Chair – Hannah Kosuge, North East London and Essex Trauma Network Manager

NMTNG Member - Elaine Cole, Director of Research and Innovation, London Major Trauma System

NMTNG Member - Mark Lilley, Paediatric Major Trauma Coordinator, Royal Hospital for Children, Glasgow

NMTNG Member - Stuart Wildman, Consultant Nurse in Major Trauma, Salford Royal NHS Trust

V1.0 (2018)

NMTNG Adult Ward Subgroup Chair - Stuart Wildman, Consultant Nurse in Major Trauma, Salford Royal NHS Trust

NMTNG Adult Ward Subgroup Vice Chair - Claire Marks, Major Trauma Centre Coordinator - MTCC Lead, Derriford Hospital

NMTNG Chair - Robert Pinate, Consultant Nurse, ED, University College London Hospitals

All Members of the NMTNG Adult Ward Sub Group: A wide group of nurses from across Trauma Units, Major Trauma Centres and Trauma Networks were involved in the original competency document creation in 2018. Please see appendix 1 for acknowledgements.

#### Organisations which kindly provided their trauma competencies in preparation of these competencies:

- Emergency Care Association, Royal College of Nursing
- Faculty of Emergency Nursing
- NHS Education for Scotland
- Nottingham University Hospitals NHS Trust
- Pan-London Trauma Nursing Group
- The Newcastle Upon Tyne Hospitals NHS Foundation Trust
- United Lincolnshire Hospitals NHS Trust

#### Introduction:

The adult ward-based nursing competencies for the major trauma patient provide a national template of competence in the care of the adult major trauma patient being cared for in an acute bed base within both major trauma centres and trauma units. The NMTNG brought together representation from the 21 major trauma networks in England and representation from Scotland, Northern Ireland, Wales, and the UK Armed Forces. The group aims to represent and develop national standards for trauma nursing from the point of injury through to rehabilitation. The competencies draw upon work already undertaken by individual Trusts, professional organisations, and groups to whom we thank for sharing their work. It was recognised that care of major trauma patients varied not just between Major Trauma Centres (MTC) and Trauma Units (TU) but also between the MTCs/TUs themselves. The group felt that these local competencies should be pulled together to create a single, national, set of competencies thereby creating and establishing a shared standard of competence in practice and service provision for the care of the adult major trauma patient within the acute bed base. With the wealth of knowledge and experience in the group, the NMTNG have developed competencies for the care of adult major trauma patient.

#### The Quality Indicator:

The Quality Surveillance Team Major Trauma Services Quality Indicators (2020) include the following standard:

On wards that care for trauma patients there should be a nurse and/or AHP available 24/7 who has successfully attained or is working toward the Adult Competency & Educational Standard of level 1 as described in the National Major Trauma Nursing Group Guidance

#### Overview of educational standard:

The NMTNG recognise that there is currently no widely taught NMTNG peer reviewed major trauma ward skills course, though courses do exist that cover much of the theoretical components of the competencies, such as Trauma Care After Resus (TCAR) and Paediatric Care After Resus (PCAR). The NMTNG is also currently investigating options for a national e-learning educational programme. The competencies aim to provide assurance that there is a baseline of one nurse per shift, who is an appropriately skilled, trained, and competent individual relevant to the major trauma patient groups cared for in your ward environment. The responsibility for completion of this competency book is for Networks, MTC's and TU's to decide locally which sections are to be completed per ward area as per local policies and procedures.

## **Educational and competency standard structure**

Trusts should aim to help staff achieve competence within 12 months of commencing work in a clinical area that cares for major trauma patients. This is in addition to and should run alongside any preceptorship / supernumerary period offered to staff. They would be expected to be able to provide evidence based and holistic care for the major trauma patient as part of a trauma focused multi-disciplinary team. In addition, they will have insight into the long-term benefits / goals of multiple treatment options / care pathways. This should enable staff to independently evaluate and plan care and pathways for major trauma patients. It is advised that assessors identified within the organisation, will utilise supporting documentation to ensure a common approach to competency assessment in practice.

#### The competencies in practice:

#### • We already have task orientated competencies in our department, why do I need these?

These competencies are intended to support and develop practice specifically in the care of the major trauma patients. There is real value in creating a single, national, set of competencies and establishing a shared standard of competence in practice which are intended to build on generic transferable skills and knowledge. This will help ensure that all major trauma patients will receive consistently high, evidence based standardised care.

#### Which competencies do I use?

This will be dependent on where you work. The competencies are divided up into smaller section which can be lifted from the full document to create a set of competencies that are relevant to your specific clinical area / patient group.

The following table is intended to guide the nurse/AHP to focus on the competency booklets applicable to them:

What Kind of area do I work in?	Do I need these competencies
A designated major trauma ward within a	Yes
major trauma centre.	
A speciality ward within a major trauma	Yes
centre that takes patients traumatic injuries	
A speciality ward within a major trauma unit	Yes
that takes patients traumatic injuries	

There are some resources available via the North East London and Essex Trauma Network on their website <a href="https://www.neletn.nhs.uk">https://www.neletn.nhs.uk</a>, which includes a training log, ward admitting schedule and training video for anyone who wishes to adapt and use.

NB: Competencies should be completed according to the admitting ward schedule. For example, if a ward does not admit Traumatic Brain Injured patients, then the staff in that area would NOT be expected to complete that set of competencies.

#### **How to use the Competencies:**

Organisational Aspects 2	Level 1 – nurse who participates in the care of the trauma patient 3	In-house Delivery 4	Work Placed Based Assessment (WPBA) 5	CPD / online Tools 6	Self-assessment 7	Assessor: Achieved competency. Print name date and sign 8
Local Trauma Network system and the	Able to describe the local Trauma Networks.					
centralisation of trauma services.	Demonstrates understanding of the trauma care system.					
	Is able to identify the key contacts involved in the major trauma patients' pathway, within your organisation.					

- 1. Title banner This describes the theme of the competence. The headings aim to make it easier for each individual area to pick out the sections relevant to their clinical area. They are structured:-
  - A-E assessment
  - Specific areas of trauma i.e. spinal set out from head to toe
  - Individual groups of patients such as older trauma patients
  - Focused issues i.e. pain management
- 2. Organisational aspect an overview of contents of that competency standard
- 3. Level 1 nurse who participates in the care of the trauma patient description of the standard expected
- 4. In-house delivery description and acknowledgement of educational standard achieved
- 5 & 6. Acknowledgment and certification of the assessment process. The abbreviations TCAR, PCAR and RCUK (Resus Council United Kingdom) have been added to the individual competencies where the theory has been covered to a sufficient level. It is important to note that simply attending the courses does not assume competency, and that the individual must have retained and be able to describe the indicator in detail to be considered competent.
  - 7. Self-assessment Individuals should use this to section to reflect their practice with relation to the specific competency utilising recognised reflective cycles / tools

- 8. Assessor: Achieved competency to be completed when the competency has been achieved as a formal record. No grading scheme is applied and a simple achieved or not achieved should be used.
- 9. There are multiple ways in which the competencies could be integrated into daily practice. One such available method created by the North East London & Essex Trauma Network can be found here.

			Organisation	al Aspects		
Organisational Aspects	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Local Trauma Network system and the centralisation of trauma services.	Able to describe the local Trauma Networks.  Demonstrates understanding of the trauma care system.  Is able to identify the key contacts involved in the major trauma patients' pathway, within your organisation.	Local delivery		TCAR		
Local guidelines and standard operating procedures (SOPs).	Demonstrates Knowledge of the existence and location of guidelines/SOPs relating to early trauma care, for example:  Secondary Transfer Bypass criteria Isolated head injury Spinal injury Burns Repatriation criteria / Process	Local/Network delivery				
Ethical, legal and professional implications of trauma.	Demonstrate basic knowledge of consent, the mental capacity act and DOLS  Demonstrate basic knowledge of:	Local/Network delivery				

Non-technical skills	Can identify essential equipment and prepare a bed space to receive	Local/Network delivery		
Preparation and reception of the major	a major trauma patient.	,		
trauma patient.	Can receive information and record it in a structured form e.g. SBAR or similar tool used in trust.			

	Airway and Breathing									
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign				
Clinical assessment and management of airway.	Demonstrates how to assess the airway of a major trauma patient.  Demonstrates the knowledge of anatomy and physiology of the airways  Demonstrates knowledge of the causes of airway obstruction and can recognise impending, partial or complete obstruction.  Demonstrates chin lift and jaw thrust manoeuvres:  • Understands the indications for a head tilt chin lift and jaw thrust • Understands the use of jaw thrust in patients with specific injury patterns i.e. facial injuries and spinal injuries.			RCUK RCUK RCUK						
	Inserting oral and nasal airways and I-gel:  • Understands the indications and contraindications of inserting oral and nasal airways and I-gel in adults			RCUK						

Clinical assessment	Breathing Assessment:			
and management of breathing and	Demonstrates knowledge of		TCAR	
ventilation.	anatomy and physiology of the respiratory system.			
	Can recognise normal breathing patterns and recognise signs and symptoms of respiratory distress.		TCAR	
	Can demonstrate knowledge of the causes of respiratory distress in trauma.		TCAR	
	Oxygen Delivery:			
	Can describe/ demonstrate different modes and delivery systems of oxygen, and indications for applying oxygen.	Local/Network delivery		
	Can demonstrate how to set up locally used humidified oxygen systems.	Local/Network delivery		
	Use of pulse oximetry:			
	Understands the indications for using pulse oximetry.		TCAR	
	Understands the potential pitfalls of pulse oximetry		TCAR	
	Can demonstrate knowledge of the correct positioning of different pulse oximetry probes.		TCAR	
	Knows where appropriate pulse oximetry attachments are stored.	Local delivery		

			Non-invasive ve	ntilation (NIV)		
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Management of Non- invasive ventilation.	Understand and demonstrate the indication for NIV and the different NIV options.	Local/Network delivery				
	Understand the risks of NIV.  Understand the emotional effects of NIV on patients and demonstration the ability to offer support.	Local/Network delivery Local/Network delivery				
	Demonstrate knowledge in the skills needed to use the relevant equipment.	Local/Network delivery				
	Understand and demonstrate the appropriate observations which should be undertaken	Local/Network delivery				
	Understand the different parameter and be able to set alarms specific for patients	Local/Network delivery				
	Understand and demonstrate the use of humidification through the NIV circuit.	Local/Network delivery				

Tracheostomy Care										
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign				
Tracheostomy management.	Can describe the anatomy and physiology of a tracheostomy.	Local/Network delivery								
	Understand the indications for a tracheostomy.	Local/Network delivery								
	Can demonstrate the knowledge and understanding of the three types of tracheostomy.	Local/Network delivery								
	Can demonstrate the ability to manage tracheostomies in line with local trust policies and procedures.	Local/Network delivery								
	Understand the appropriate monitoring needs of a patient following decannulation.	Local/Network delivery								
	Understand associated swallowing risks/ difficulties and the appropriate action that is required.	Local/Network delivery								

			Circulation M	anayement		
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency Print name date and sign
Clinical assessment and management of circulation	Circulatory assessment:  Has a working knowledge of the			TCAR		
	anatomy and physiology of the circulatory system.			19741		
	Can describe and explain the clinical signs of shock in the trauma patient.			TCAR		
	Can list the different types of shock relevant to the trauma patient			TCAR		
	Demonstrate the principles of circulatory assessment.			RCUK		
	Has a basic understanding of the 5 sites of traumatic haemorrhage:  Chest Abdomen Pelvis Long bones External			TCAR		

Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
The secondary management of major/massive haemorrhage	Demonstrates knowledge of local major/massive haemorrhage protocol including activation guidelines.	Local/Network delivery				
	Demonstrates an understanding of the use of anti-coagulant reversal agents in the trauma patients.			TCAR		
	Demonstrates an understanding of the indications for administering tranexamic acid.			TCAR		

	Disability										
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign					
Clinical assessment and management of disability in the trauma patient	Demonstrates the appropriate use of both AVPU and GCS and the relevance of abnormal findings of each component.	Local/Network delivery									
	Can describe the escalation process of patients in relation to a reduced conscious level.	Local/Network delivery									
	Can demonstrate the assessment of:	Local/Network delivery									
	Demonstrates an understanding of the relevance of blood glucose monitoring in the trauma patient.			TCAR							

	Exposure and Temperature Control								
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign			
Clinical assessment of exposure and temperature control	Have a knowledge and understanding of temperature control			TCAR					
	Demonstrates an understanding of hypothermia and its potential effects of the trauma triad.			TCAR					
Management of exposure and temperature control	Understands the principles and methods of warming techniques.			TCAR					
Patient exposure assessment	Demonstrates an understanding of a head-to-toe patient assessment.			TCAR					

Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Understands the basic functions and the anatomy and physiology of the brain and cranium.	Has a working knowledge of neurological anatomy.  Describes the basic function and relevance of injury to the 4 lobes of the brain:  • Frontal Lobe  • Parietal Lobe  • Temporal Lobe  • Occipital Lobe  Demonstrates the ability recognise signs of raised intracranial pressure in a patient with a traumatic brain			TCAR TCAR		
	injury.					
Understands the pathophysiology of traumatic brain and cranial injury.	Demonstrates a knowledge and understanding of significant traumatic brain injuries			TCAR		
orania injary.	Demonstrates an understanding of craniofacial trauma, common assessment, findings and interventions.			TCAR		
Understands the classifications of traumatic brain injury.	Demonstrates a knowledge and understanding of classifications of brain injury and its presentation:  Primary injury Secondary injury  Mild traumatic brain injury Moderate traumatic brain injury Severe brain injury			TCAR		
Care of the pre and post-operative neurosurgical patient	Demonstrates the ability to care for the postoperative patient:	Local/Network delivery				

	Demonstrates a knowledge and understanding of neurosurgical procedures including:  Burr hole surgery Craniotomy Decompressive craniotomy		TCAR	
Demonstrates an ability to care for patients with a traumatic brain injury holistically and can plan, implement and evaluate care.	Demonstrates a knowledge and understanding of potential complications following a traumatic brain injury and subsequent management:	Local/Network delivery		
	Describes and understands the use of pharmacological and non-pharmacological interventions.	Local/Network delivery		
	Understands and demonstrates the role of the MDT	Local/Network delivery		
	Demonstrates and understanding of nutritional management of patients with a TBI	Local/Network delivery		

		Manageme	nt of maxillofacial	, cranial and oc	ular trauma	
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Understands the anatomy and physiology of the facial bones.	Describes the basic structure of the facial bones:      Orbital bones     Maxillary sinuses     Nasal bones     Zygomatic bones     Mandible		,	TCAR		
Understands the pathophysiology of maxillofacial trauma	Demonstrates a knowledge and understanding of facial fractures, common assessments and findings and interventions:  Orbital fracture Orbital blow out fracture Zygomatic fracture Mandible fracture Tooth trauma	Local/Network delivery				
	Demonstrates a knowledge and understanding of the implications of facial trauma, assessment and management:  • Management of soft tissue injuries • Management of facial lacerations • Able to provide maxillofacial advice for patients • Pain management of facial injuries • Dietary advice • Psychological support	Local/Network delivery				
Understands the anatomy and physiology of the eye.	Demonstrates an understanding of the structures of the eye:	Local/Network delivery				
Understands the pathophysiology of eye trauma.	Demonstrates a knowledge and understanding of the management of eye trauma:					

Prevention of eye infections and eye care     Periorbital haematomas     Physiological impact of eye trauma			
Can identify emergency eye trauma, and to escalate appropriately.			

			Thoracic injury a	nd managemei	nt	
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Understands the anatomy and physiology of thoracic injuries.	Demonstrates an understanding of the pathophysiology of thoracic injuries, how each would present and the principle concepts of nursing management.		(	TCAR		
	Can describe:			TCAR RCUK		
	Demonstrates understanding of the protocol / management for thoracic injuries in your local area and where to find it.	Local/Network delivery				
	Demonstrates knowledge and understanding of possible complications and how to manage / escalate them.			TCAR		
	Demonstrates a knowledge understanding of the management of rib fractures, including:  Surgical fixation Early mobilisation Underlying lung injury Requirement for level 2 care	Local/Network delivery		TCAR		
Management of chest drains	Understands the indication for insertion of a chest drain.			TCAR		
	Understands and demonstrates the ability to set up a chest drain for insertion.	Local/Network delivery				
ı	Understands and demonstrates on going care of a chest drain:  Insertion site care Active mobilisation Monitoring and documentation	Local/Network delivery				

Indication for when bottle should be chand the procedure this.     Complications of a drain being insitu     Application of low thoracic suction.     Removal indication procedure	ange for chest			
Understands the importance of management and chest physiotherapy in relation to loo policy	delivery	TCAF	3	
Demonstrates an understandi potential life-threatening interr injuries as a result of chest tra how each would present and the principle concepts of nursing management for example:  • Cardiac tamponade • Cardiac contusions	nal uma, he	TCAF		

Spinal column and Spinal Cord Injury									
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name - date and sign			
Demonstrates safe	Understands the indications for c-			TCAR					
spinal immobilisation and management.	spine immobilisation and when to initiate it								
	Can demonstrate how to perform manual c-spine immobilisation.	Local/Network delivery		MASCIP guidelines					
	Can demonstrate c-spine immobilisation, sizing and using appropriate devices.	Local/Network delivery		MASCIP guidelines					
	Can demonstrate being part of a team performing a log roll/tilt and describe each role.	Local/Network delivery		MASCIP guidelines					
	Understand and demonstrate safe assessment and support of oral nutrition and hydration of the immobilised patient.	Local/Network delivery							
	Understand and demonstrate safe assessment and assistance with elimination needs.	Local/Network delivery		MASCIP guidelines					
	Understand and demonstrate safe assessment and support of pressure area care.	Local/Network delivery		MASCIP guidelines					
Understands the anatomy and physiology of the spinal column and cord and its function	Demonstrates a knowledge of normal anatomy and physiology of the spinal column and cord:  Spinal cord and column division Spinal nerves Motor and sensory function of the spinal cord Autonomic nervous system Anatomy of a vertebrae			TCAR					
	Demonstrates an understanding of MOI, including:  • Hyperflexion Injury • Extension Injury			TCAR					

	1		=0.15		
Clinical assessment	Demonstrates a knowledge and		TCAR		
and management of	understanding of the patient				
patients with spinal	presentation of SCI and the potential				
cord injuries	complications and implications:				
	Cervical level

	Demonstrates a knowledge and	Local/Network	MASCIP		
	understanding of the	delivery	guidelines		
	pathophysiology of autonomic	•	=		
	dysreflexia and its identification/				
	treatment				
	Demonstrates a knowledge and				
	understanding of the psychological				
	and or all the psychological			1	

	effects of SCI and support services available	Local/Network delivery		
	Understands the referral pathway for SCI patients including the importance of ASIA scoring.		TCAR	
	Demonstrate knowledge and understanding of nutritional risks and how to assess and reduce these risks.	Local/Network delivery		
Clinical assessment and management of patients with spinal column injuries	Demonstrates a knowledge and understanding of vertebral column injuries:      Fractures (various types)     Subluxations/dislocations     Penetrating injuries     Stable injuries     Unstable injuries		TCAR	
	Demonstrates a knowledge and understanding of treatment options for vertebral injuries:  Conservative Surgical		TCAR	
The management of cervical spine collars	Understand and demonstrate knowledge of the rationale behind the use of C-spine collars.	Local/Network delivery		
	Understand and demonstrate possible barriers / contraindication to the use of C-spine collars.	Local/Network delivery		
	Understand and demonstration the ability to assess and size patients for a c-spine collar in keeping with local guidance and training.	Local/Network delivery	MASCIP guidelines MASCIP	
	Understand and demonstrate the ability to care for a patient with a cspine collar:  • Pressure area / skin	Local/Network delivery	guidelines	
	integrity care Appropriate pain relief Possible complications to be aware of.			

	<ul> <li>How to safely remove for hygiene purposes</li> <li>How to emotionally support patients.</li> </ul>			
The management of spinal braces	Understand and demonstrate knowledge of the rationale behind the use of spinal braces.	Local/Network delivery	TCAR	
	Understand and demonstrate possible barriers / contraindication to the use of spinal braces	Local/Network delivery		
	Understand and demonstrate the ability to care for a patient wear a spinal brace:  • Pressure area / skin integrity care.  • Appropriate pain relief  • Possible complications.  • How to safely remove for hygiene purposes.	Local/Network delivery	MASCIP guidelines	
	How to emotional support patients especially with body image issues.	Local/Network delivery		

	Abdominal Trauma									
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign				
Clinical assessment and management of blunt & penetrating abdominal injuries.	Demonstrates a knowledge and understanding of the mechanisms involved in blunt and penetrating trauma.			TCAR		-				
	Demonstrates knowledge and understanding of the potential for emergent abdominal injuries not apparent during initial assessment and treatment period.			TCAR						
	Demonstrates a working knowledge of the anatomy of the abdomen.  • Peritoneal cavity  • Retroperitoneal cavity  • Pelvis			TCAR						
Clinical assessment and management of the patient with abdominal trauma	Is able to demonstrate the ability to carry out basic assessment of the abdomen and understands possible signs that would require escalation  Wounds  Bruising (i.e. Grey-Turners sign, Cullen's sign)  Imprints  Distension (how to measure with local guidance)  Acknowledge need to include back, genitals, perineum, wary of blood at meatus and rectum	Local/Network delivery		TCAR						

Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Medical interventions in the management of abdominal trauma	Has an understanding of emergency and ongoing medical management of abdominal trauma:      Options for operative management     Options of and rational behind damage control surgery     Interventional Radiology     Understands when Conservative management would be most appropriate	Local/Network delivery		TCAR		
Secondary management of abdominal trauma	Can anticipate potential complications and understand how to escalate in line with local policies.	Local/Network delivery		TCAR		
	Demonstrates knowledge of related nursing interventions regarding the following:  • Understands indications for gastric decompression with nasogastric tube (aligned with local policy)  • Observe quality and frequency of bowel movements and importance of avoiding constipation  • Stoma care.  Demonstrates an understanding of the educational needs and psychological impact on the patient.	Local/Network delivery  Local/Network delivery  Local/Network delivery

Cliniaal Clailla	Laval 4	lu be	Morte Diana	CDD /	Oalf		
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign	
Management and Care of limb injuries	Identify different types of I limb injuries and mechanism for injury.			TCAR			
	Demonstrate how to assess neurovascular status	Local/Network delivery		TCAR			
	Understand the use of splints/ slings and braces local to your area.	Local/Network delivery					
	Understand and demonstrate the ability to care for a patient with splints/slings and braces  Pressure area care Appropriate pain relief Potential complications	Local/Network delivery					
	Has an understanding of the management of open lower limb injuries in line with national guidance.			TCAR BOAST*			
Management and care of Pelvic injuries	Demonstrate the understanding of pelvic injuries and mechanism of injury			TCAR			
	Identify their presentation and potential complications including potential for injury to internal organs			TCAR			
	Discuss issues regarding moving and handling stable/unstable pelvic fractures	Local/Network delivery		TCAR			
	Demonstrate how to assess neurovascular status	Local/Network delivery		TCAR			
	Understand rationale for pelvic binders and when to remove	Local/Network delivery Local/Network		TCAR			
	Understand and demonstrate the ability to care for a patient with different pelvic fixations	delivery		TCAR			
Management of amputations	Demonstrates knowledge of the level of amputations and their implications.	Local/Network delivery					
	Demonstrates knowledge of the different types of amputation	Local/Network delivery					

	Demonstrates knowledge of pain management and wound care of amputations.	Local/Network delivery		
	Demonstrates an understanding of psychological impact of amputation	Local/Network delivery		
	Can demonstrate knowledge of the local pathway for rehabilitation and prosthesis fitting	Local/Network delivery		
External Fixators	Demonstrates knowledge of different external fixators and their implications for use		TCAR	
	Demonstrate pin-site care as per local policy and national guidance Demonstrates how to identify and how to escalate any concerns re infection	Local/Network delivery	RCN	
	Demonstrates knowledge of the psychological impact of external fixators	Local/Network delivery		
Skin and Skeletal Traction	Demonstrates knowledge of the rationale behind the use of skin and skeletal traction and injuries it may be used for.		TCAR	
	Demonstrates knowledge of the possible barriers and/or contraindication to the use of traction.		TCAR	
	Demonstrates what equipment is required for application and how to apply it / set up the bed frame.		RCN	
	Demonstrates the ability to care for a patient with traction	Local/Network delivery		
Compartment Syndrome	Demonstrates an understanding of the physiology of compartment syndrome.		TCAR	
	Demonstrates an understanding of the implications of compartment syndrome		TCAR	
	Demonstrates the ability to monitor for compartment syndrome		TCAR	
	Demonstrates an understanding of how and when to escalate abnormal findings		TCAR	
	Demonstrates a knowledge of the		TCAR	

	treatment of compartment syndrome			
Other MSKN Complications	Demonstrates knowledge of and how to assess for the following:  Pulmonary embolism Fat Embolism Foot/wrist drop Rhabdomyolysis Pressure sores Fracture blisters Nutritional status Infection	Local/Network delivery	TCAR (with exceptio n of foot/wrist drop)	

<sup>\*</sup>British Orthopaedic Association Standards for Trauma

		F	Pain Assessment a	and Manag	ement	
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Clinical assessment of Pain	Demonstrates a knowledge and understanding of the anatomy and physiology of pain.	Local/Network delivery				
	Demonstrates an understanding of the physiological, behavioural and psychological responses to pain:  Sympathetic Parasympathetic Inadequate pain management in the trauma patient	Local/Network delivery				
	Demonstrates an understanding of the different types of pain and their presentation:  Traumatic Neuropathic MSK Visceral Referred Acute Chronic	Local/Network delivery				
	Demonstration of knowledge and use of your local trust policy on the management of acute pain.	Local/Network delivery				
	Demonstrates an understanding of the pain assessment tools available and when to apply them.	Local/Network delivery				
Pain management	Demonstrates an understanding of pharmacological and non-pharmacological interventions to pain:	Local/Network delivery				
	Can demonstrate competence in the use of PCA/epidural management in accordance with local policies and training.	Local/Network delivery				
	Understands the care and management of a patient following regional anaesthesia.	Local/Network delivery				

			The Older Traum	a Patient		
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Clinical assessment and manage of older trauma patients	Demonstrates a knowledge and understanding of the various mechanisms of injury in older patients.			TCAR		
	Demonstrates knowledge of the key considerations in the care of an older trauma patient.			TCAR		
	Demonstrates knowledge and understanding of the principal physiological changes in the older and its impact in trauma including.			TCAR		
	Has an awareness of the assessment and management process of dementia patients.			TCAR		
	Demonstrates an understanding of the effects of delirium and prevention strategies.	Local/Network delivery				
	Demonstrates an understanding of the potential implications and complications of prolonged bed rest in the older patient.			TCAR		

	The Pregnant Trauma Patient								
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign			
Clinical assessment and management of the pregnant trauma patient	Demonstrates knowledge of the key considerations in the care of pregnant trauma patients.	Local/Network delivery							
pation	Demonstrates knowledge and understanding of the principal physiological changes in pregnancy	Local/Network delivery							
	Demonstrate understanding and ability to provide emotional support for patient and family members.	Local/Network delivery							
	Demonstrates an understanding the potential risks in pharmacological management.	Local/Network delivery							
	Demonstrates knowledge of the importance of left lateral tilt and how to perform.	Local/Network delivery							

The Bariatric Trauma Patient							
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign	
Clinical assessment and management of the bariatric trauma	Demonstrates an understanding of the MOI associated with the bariatric patient.			TCAR			
patient	Demonstrates knowledge and understanding of the principal physiological differences in the bariatric patients and can outline key considerations in their care.			TCAR			

		Challengii	ng behaviour in t	he trauma pa	tient	
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Clinical assessment and management of the confused, agitated, and aggressive trauma patient	Demonstrates an understanding of the key considerations in the care of the confused, agitated and aggressive trauma patient.	Local/Network delivery		TCAR		
	Demonstrates knowledge of the causes of challenging behaviour	Local/Network delivery		TCAR		
	Demonstrates knowledge and understanding of both local, in hospital and community based services.	Local/Network delivery				
	Demonstrate knowledge of the local policy on both physical and chemical restraint and have a working knowledge of when they should be used.	Local/Network delivery				
	Demonstrates knowledge of the role the security and the police play in these policies.	Local/Network delivery				
	Demonstrate knowledge of how to document and escalate such behaviours appropriately.	Local/Network delivery				

			Wound Ca	re		
Clinical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency. Print name date and sign
Clinical assessment and management of traumatic wounds	Demonstrates an understanding and describes the anatomy and physiology of the integumentary system.	Local/Network delivery				
	Demonstrates knowledge understanding and skills in the management of the different types of wounds in the major trauma patient	Local/Network delivery				
	Demonstrate understanding and skills in wound assessment and be able to highlight possible complications and other considerations that should be taken into account when dealing with the above wounds.	Local/Network delivery				
	Demonstrate knowledge of the local escalation policies to refer to speciality teams where appropriate.	Local/Network delivery				
	Demonstrate knowledge and skill in keeping with local training and competencies of local commonly used wound care devices and approaches.	Local/Network delivery				

Non-Technical Skills	Level 1 – nurse who participates in the care of the trauma patient	In-house Delivery	Work Placed Based Assessment (WPBA)	CPD / online tools	Self-assessment	Assessor: Achieved competency Print name date and sign
	Demonstrate awareness of the psychological impact of trauma			TCAR		
	Demonstrates awareness of the role of clinical psychology in the care of the trauma patient.	Local/Network delivery				
	Demonstrates understanding of psychological support mechanisms available in the care of the trauma patient			TCAR		

### Appendix 1: V1.0 (2018) acknowledgements

NMTNG Adult Ward Sub Group Chair - Stuart Wildman, Consultant Nurse in Major Trauma, Salford Royal NHS Trust

NMTNG Adult Ward Sub Group Vice Chair - Claire Marks, Major Trauma Centre Coordinator - MTCC Lead, Derriford Hospital

NMTNG Chair - Robert Pinate, Consultant Nurse, ED, University College London Hospitals

#### All Members of the NMTNG Adult Ward Sub Group:

Diane Armstrong, Senior Sister Trauma Ward, Leeds Teaching Hospital NHS Trust

Rachel Brailsford, Trauma Nurse Practitioner, Nottingham University Hospital

Rebecca Blythe, Lead Major Trauma Specialist Nurse, Leeds Teaching Hospital NHS Trust Sharon Budd, Trauma Nurse, Derby Hospitals NHS TrustNicola

Caygill, Acting Senior Sister ED/UCC, Leeds Teaching Hospital NHS Trust
